WINDOW TREATMENTS

Window Blinds

All our blinds are manufactured and fitted to conform with British safety standards for child safety, all our components are fully tested and we use BS EN 13120 compliant systems.

We supply bespoke blinds for residential developments from individual apartments to large scale BTR schemes. We offer free consultation and survey where our consultants will assess the size and type of window to provide the perfect window solution.

We work with property developers, contractors, facilities managers, property agents and landlords to supply and install blinds that meet the requirements of your resident. Offering a bespoke finish that combines style, privacy, durability, practically and value.

All our blinds are made to measure and offer a high quality and finish. Our trained and dedicated installation team, ensure no disruption within your apartments, we can even collect keys and contact residents to arrange a suitable time.

Roller Blinds

Our UK designed and manufactured roller blinds are stylish, reliable and easy to operate. The smooth operating system ensures the blind can be rolled up or down easily to achieve the required level of shading for you.

Our roller blind collection is an exciting mix of fabrics specially selected to complement and coordinate with any room in the home. Whether it's one of our modern designs for your living room, blackout fabric for the bedroom or a moisture resistant print for the bathroom or kitchen, all

our blinds are individually manufactured to your unique specification.

We can even make your blind using energy saving fabrics. Choosing these fabrics with enhanced insulating properties will reduce heat build-up in summer and heat loss in winter, reducing heating and cooling costs in your home.

Motorised options available on request.

Vertical Blinds

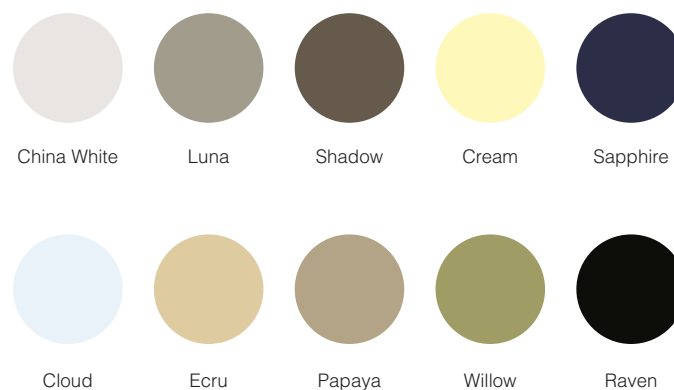

Vertical blinds are designed to offer complete shading and privacy flexibility. Choose from a stunning range of fabrics designed to suit every room, colour scheme and shading requirement in your home, whether it be a light filtering, dimout or blackout fabric.

Our made to measure vertical blinds can be drawn neatly to the side allowing unlimited views, or the louvres can be

rotated to allow just the right amount of light into the room to maintain an element of privacy. This highly practical window shade can be made up to 5m wide, so they make an ideal choice for large windows, patios or bi-fold doors. All our vertical blinds are designed to be child safe and have a wand operation for convenience and safety.

Making Your Home Safe

Safe by Design

A blind which is Safe by Design is one that is cordless or has concealed or tensioned cords.

- Usually these blinds are pushed or pulled into position
- Motorised blinds can also remove the need for operating cords at the side of the blind

Chain-break connector

These will break apart when undue pressure is applied on the operating chain but, after inspection, can be reconnected again. Chain sizes vary so you must use the chain-break connector which is designed to be used with your specific chain.

Cleat

This should be securely fixed to an adjacent surface out of the reach of children and at least 1.5 metres from the floor. The cords must be secured in a figure of eight after each and every operation of the blind. Ensure all spare cord is securely contained on the cleat.

Cord/Chain tidy's & tensioners

These devices should be securely fixed to an adjacent surface and at the maximum distance from the top of the blind so the cords and/or chains are held permanently taut by the device.

All our Core Ranges are fire retardant*
